PROFILE

As a dedicated and enthusiastic student, I have a strong passion for coding and an interest in exploring different programming languages. During my previous student jobs I gained valuable experience in equipment repair, stage setup and takedown, and sound and lighting operations. This experience has honed my attention to detail, problem-solving skills, and ability to work collaboratively with a team. I am eager to continue developing my skills and contribute to new projects in the coding industry.

EXPERTISE

- C++
- C#
- Python
- HTML
- CSS
- Java
